II.2.4) Description of the procurement

This Lot is expected to involve the provision of data services that append selected consumer classifications or data variables to customer records held on a data warehouse for approximately 25 000 000 retail savings customers who invest with NS&I. This will help NS&I identify certain customer groups and understand their likely preferences and behaviours and may cover channel usage and preference, indications of life stage, levels of affluence and suitability for savings products as well as other possible variables. The classifications proposed by economic operators at the tendering stage will be assessed in terms of their ability to support profiling of customers for retail savings and investments products and transaction and research channel preference and analysis and marketing campaign targeting and evaluation.

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2.14) Additional information

NS&I wishes to gauge the market interest in providing the data services to meet NS&I's requirements described under this Lot by conducting a market engagement exercise to obtain the views of economic operators through a questionnaire which economic operators can download and complete by registering their organisation on the NS&I eProcurement tool: <https://nsandi.eu-supply.com/login.asp?B=NSANDI>

II.2.4) Description of the procurement

This Lot is expected to cover the establishment of a framework agreement with a single supplier for the provision of data modelling services for NS&I's Business Insight team. To aid campaign selections, NS&I has developed a suite of propensity and look-alike models that can be deployed. To ensure that NS&I's Business Insight team can support the business of NS&I as required, there is occasional need for external support. This is expected to include advising on the use of the most suitable technique in work that requires detailed analysis and profiling or delivering an analytical project from start to finish, which may involve building a model or segmentation.
