Text

With Proactis you can build and maintain a strong supplier base by structuring and streamlining the entire supplier lifecycle – from initial identification to adoption, approval, transaction and analysis. It helps reduce supplier risk and improve supplier relationships while dramatically reducing administrative effort.

Proactis Supplier Management makes it easy to build and maintain a comprehensive supplier directory and manage the supplier lifecycle by providing web-based tools to support supplier recruitment, qualification, adoption and appraisal.

Problem

Effectively defining the buying need and selecting the right supplier is critical for an organisation that wants to reduce both cost and risk. But whether it's for a one-time capital equipment purchase or service contract, or for ongoing supply of frequently used goods or services, the sourcing process can be complex and time consuming.

Solution

Proactis helps to streamline and standardise sourcing processes to improve Procurement capacity and achieve best value. Sourcing events can be performed in a fast, consistent, successful manner by either functional departments or Procurement in a fraction of the time. And in some categories, the ability to perform frequent, effective eAuctions can drive even greater savings.
