

23088 Scale: 1:7,250

Id,Species,Comments

-  1,SS,Old selective thinning, quite heavy selective. Good volume and dbh and good saw log crop.
-  2,SS,Remains unthinned, some self-thin. Better drained, good volume and dbh.
-  3,SS,Unthinned, gappy with missing trees. Often boggy and moss covered trees. Some good dbh but poor stocking.
-  4,SS,Old racked, 1 in 6 less heavily selective. Some good volume and dbh.
-  5,SS,Unthinned, self-thinned good volume.
-  6,SS,Unthinned, poorly drained and poorer volume with missing stems. Some double stems and moss covered trees.
-  7,SS,Old thinned, racked and selective. Good volume and good saw log potential.
-  8,WBL,Areas of more recent wind blow, mostly still green.
-  9,WBL,Areas of older wind blow, mostly non-green with some regen developing in places.
-  10,OPN,Open rides, gaps etc.
